3. Become familiar with the tools you will need for your project. Measure your walls, then compute out how much paint you will need to paint each wall. Figure out what supplies you will need. If you want faux finishes, what items will you need for that? Decide which window treatment interests you, for example: curtains, blinds, swags, etc. Then, measure windows for treatments.
4. Go to a furniture store, home decorating store, fabric store and hardware store to find and price the items you want in your finished room that reflect your style. For example: contemporary, traditional, retro, etc.
